

UK OFQUAL - REGULATED

LEVEL 5 MANAGEMENT AWARD IN CORPORATE RISK & CRISIS MANAGEMENT

24th – 26th March 2019 Abu Dhabi, UAE

▲ MOST MAN-MADE DISASTERS & VIOLENT CONFLICTS ARE PRECEDED BY INCUBATION PERIODS DURING WHICH POLICY MAKERS MISINTERPRET, ARE IGNORANT OF, OR FLAT-OUT IGNORE REPEATED INDICATIONS OF IMPENDING DANGER.

Boin & t'Hart, 2003:547

UK OFQUAL - REGULATED

LEVEL 5 MANAGEMENT AWARD IN CORPORATE RISK & CRISIS MANAGEMENT

In the modern world, security and risk managers can no longer claim that they are in control of factors such as terrorism, climate change, social and political instability, natural disasters, technological breakdown, supply chain failures or any of the other rapidly cascading threats that could cause disruption, and potentially catastrophic destruction, to their operations.

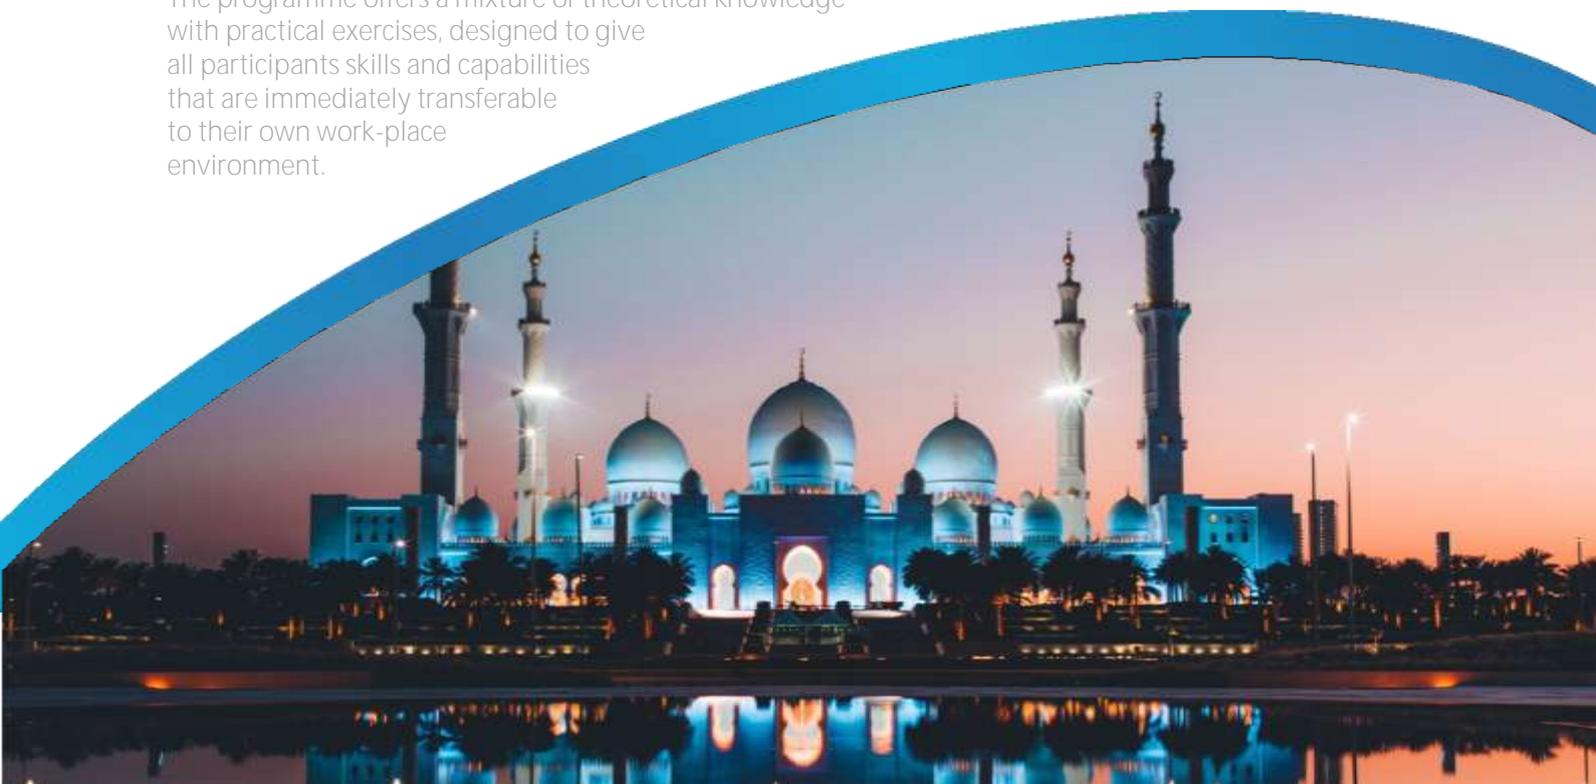

For most security managers, genuine crises are events that they are likely to encounter no more than once or twice in their careers. It is at such moments that lessons learned over years of experience come into play. This course will prepare crisis managers to deal with such events as professionally and effectively as possible, and in so doing, will ensure the greatest safety for their organisations, operations and personnel.

This course has been designed for experienced security, risk and crisis managers who are being tasked with the planning and management of increasingly complex scenarios.

COURSE MATERIAL INCLUDES

- o Crises: Complexity and Chaos
- o The Three-Stage Risk Management Cycle
- o Corporate Risk Management and Crisis Decision-Making
- o Planning, Training and Exercising
- o Command, Control & Coordination in a Crisis Environment
- o Planning the Time-Line
- o Ten Lessons from Global Crises
- o Self-Auditing: How Ready Are You?
- o The Resilient Organisation: From Concept to Delivery
- o Why Crisis Management Fails: Creating High Reliability Organisations

The programme offers a mixture of theoretical knowledge with practical exercises, designed to give all participants skills and capabilities that are immediately transferable to their own work-place environment.

1

COMPLEXITY & COMMUNICATIONS

Once a crisis event has been triggered, the word most commonly used to describe the surge of communication exchange is '**overwhelming**'. How can an organisation prepare itself to manage the communication surge, and to maintain control of the information exchange process between multiple stake-holders?

2

COMMAND & CONTROL

Command and Control has changed radically since a general could see the whole battlefield in real time. However, the purpose of the C2 / C3 process has remained the same: To gather information, make a plan, and communicate with teams on the ground who are running the operation.

3

MEDIA MANAGEMENT

In the modern world of instant communications, a business can go from world-beating to catastrophic disaster in an instant. There is no shortage of examples where global organisations faced a catastrophic drop in shares prices, as well as irrecoverable loss of reputation, in less time than it takes to convene a meeting of the crisis management team.

DELTAR

TRAINING SOLUTIONS

Deltar Training Solutions has developed a reputation as a world-leader in all aspects of critical capability development involving risk and crisis management. Deltar has worked with government agencies, security ministries, global financial institutions, multi-national corporations, national transport agencies and global sporting events to develop an understanding of what exactly happens during large-scale crisis events, and how an organisation can best prepare itself to deal with them.

Deltar's experience in working with clients in Europe, Asia, Africa and the Middle East means that we have an understanding of the global nature of modern crises, and can develop a framework that can be adapted to the specific needs of each and every participant in our programmes.

COURSE LEADER:

DR DAVID RUBENS D.SYRM, CSYP, FSYI

David has been involved in security consultancy since 1992. He has an MSc in Security and Risk Management from Leicester University (2006) and was a Visiting Lecturer and Dissertation Supervisor on the Leicester University 'Security, Policing and Terrorism' MSc programme. He has also been a Visiting Lecturer (2010-'11) on the Strategic Leadership Programme at Cranfield University, the civilian research wing of the UK Defence Academy, where he specialised in terrorism and public policy, and strategic management of large-scale, complex operations. He completed his Doctorate in Security and Risk Management at University of Portsmouth (2016), writing his thesis on strategic management and critical decision-making in hyper-complex crisis environments. He has served two terms as a Board Director of the UK Security Institute, and has been published widely in professional magazines.

A MESSAGE FROM DR DAVID RUBENS

For modern security managers, the world is very different from that we were used to ten or twenty years ago. One of the most fundamental differences is the complexity of the risk environment that we are operating in, and it is that complexity that leads to the crisis scenarios that we are faced with today. For the modern corporation, every aspect of their operation is based on a highly- interconnected network of sub-operations, the failure of anyone which could be the trigger for a major, and potentially catastrophic, corporate failure. The nature of outside events – natural disasters, climactic changes, terrorism, political instability or supply chain collapse to name but a few, pose challenges that few security managers have actually been prepared for. Whilst each crisis is unique in itself, the challenges they create are highly predictable, and it is the creation of a robust and resilient crisis management capability based on effective planning and management that differentiates those organisations that are able to survive and recover from crisis events, and those organisations that are actually inherently unprepared, and are likely to fail at the earliest stage of any crisis situation.

This course, which has been run for major international organisations, corporations and government and security agencies across the world, is designed to give participants an insight into how crises develop, how they impact on an organisation, and how that organisation can best prepare itself for a strong, speedy and effective response. I hope that we will see you on the courses, and look forward to sharing much more information with you then'.
